This headquarters building, earlier called a school building, was built in 1944 north of building #835, between 5th and 7th Streets, access off A Street. The type of construction is "Mobilization," "Semi-Permanent," Sch-A-A. It was built from plan 1000-470 for \$14,000.00 and is 9248 square feet.

Building 833 has an H-shaped floor plan, with the legs of the H facing north and south. The legs measure 25 feet-4 inches by 108 feet each, while the center section is a large, open room measuring 40 feet by 73 feet. The east and west wings each contain large rooms on each end with three small, narrow rooms in the center.

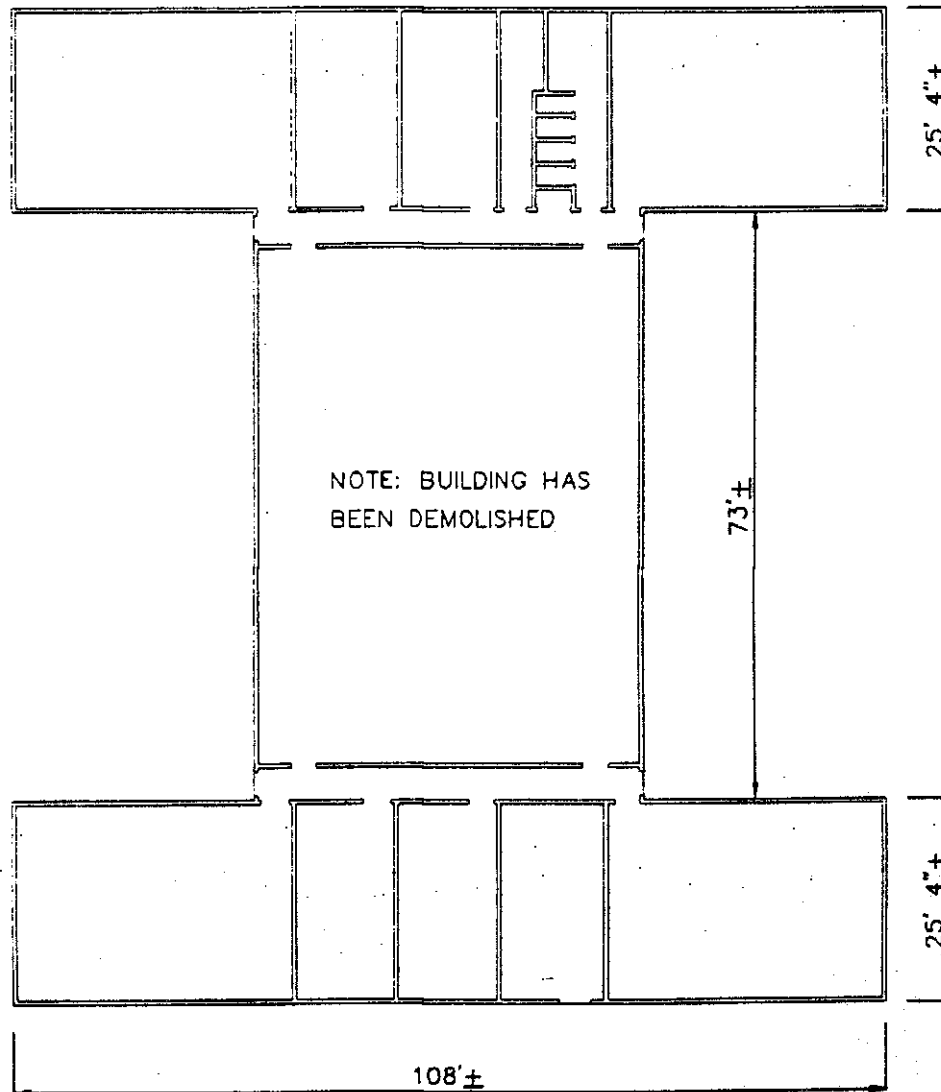

The building has a concrete pier foundation, wood frame floors and walls and a gable roof with asphalt roll roofing. Along the center of the west wall is a tall, brick chimney. The windows are 9/9 and 6/6 double-hung sash types. The doors have 4-light glass panels above three horizontal wood panels. The exterior of the building is in poor repair, as is much of the interior. The interior contains restrooms, a forced air furnace and exposed heating ducts, a "bubbler" and 67 incandescent lights. Building 833 was recently torn down.
